PROFESSIONAL SUMMARY

Full stack web developer with a Higher Technologist degree in Software Development (2025) and freelance experience since 2024 building web applications with Angular, Spring Boot, MySQL, MongoDB and Supabase. I understand what each client needs, communicate it clearly and deliver functional, responsive and secure solutions. Self-driven, analytical and detail-oriented; a fast learner looking to join a development team.

PROFESSIONAL EXPERIENCE

Freelance Web Developer **2024 – Present**
Self-employed | Ecuador

- Designed, built and maintained websites and web applications end to end (UI, logic and data) based on each client's requirements.
- Built responsive interfaces with Angular, tested on desktop and mobile devices to ensure a good user experience.
- Connected applications to REST APIs and databases (Supabase, MySQL), with authentication and row-level security (RLS) to protect data.
- Deployed and maintain sites on Vercel with Git/GitHub version control; test, fix bugs and ship improvements after each delivery.

Freelance Computer Maintenance and IT Support Technician **2022 – Present**
Self-employed | Ecuador

- Preventive and corrective maintenance of computers; hardware and software troubleshooting and installation of systems and applications.

SOFTWARE PROJECTS

Online Store with Catalog Administration **2026**
Angular • Supabase • Vercel • SSR • RLS

- Built the public catalog and admin panel, connected to Supabase with authentication and per-user RLS policies; server-side rendering (SSR) and Vercel deployment.

Management Platform for a Greengrocer **2025**
Angular • Java / Spring Boot • MySQL • REST API

- Built the Angular frontend and Spring Boot backend to manage customers, products and invoicing through CRUD operations and REST services.

NoSQL Data System for Business Management **2025**
MongoDB • Java • Spring Data MongoDB

- Modeled customer, product and invoice data, and defined indexes, queries and validations to keep information consistent.

EDUCATION

Instituto Tecnológico Superior Quito Metropolitano (ITSQMET) **2023 – 2025**
Higher Technologist in Software Development

- Coursework: operating systems and networks, programming and databases, web and mobile applications, software quality (SQA), information security, artificial intelligence and business intelligence, and software development methodologies.

ADDITIONAL EXPERIENCE

Customer Service and Technical Support (2023 – 2025): handled and resolved user issues by phone, email and chat, with case logging and escalation. **Administrative Assistant and Customer Service** (2021 – 2023).

TECHNICAL SKILLS

Frameworks and backend: Angular, TypeScript, Spring Boot, REST API / CRUD, responsive design, SSR, web and mobile application development
Languages: TypeScript, JavaScript, Java, Python, SQL
Databases and tools: MySQL, MongoDB, Supabase, Git, GitHub, Vercel
Quality and security: Software quality (SQA), testing, information security, authentication and access control (RLS)
AI and data: Artificial intelligence fundamentals, business intelligence, data analysis
Methodologies and fundamentals: Software development methodologies, operating systems, networking, discrete mathematics
Web fundamentals: HTML, CSS

SOFT SKILLS

Clear communication with technical and non-technical users, problem solving, analytical thinking, self-management and teamwork, time management, proactivity, patience and empathy, attention to detail, adaptability, calm under pressure and continuous learning.

LANGUAGES

Spanish: native | English: upper-intermediate (B2)
